SSW is a Sydney-based consulting company specialising in .NET solutions for progressive businesses since 1990. SSW offers custom software solutions including data-driven websites & windows applications. SSW utilises the latest Microsoft technologies including ASP.NET, C#, VB.NET, SQL Server, XML, Microsoft CRM, Exchange Server and SharePoint.

SSW Application Audit Services are also available to discover where your application can be improved. We specialise in the following areas:

- Architecture Review
- User Interface Review
- Code Review
- Performance Review
- Security Review

SSW's Chief Architect, Adam Cogan is one of only two Australian Microsoft Regional Directors. His expertise helps SSW deliver cutting edge Microsoft technology solutions.

MicrosoftSharePoint.com

proudly developed by SSW

Microsoft Australia approached SSW to develop a site in preparation for the Microsoft SharePoint and Office Forum 2008. SSW completely overhauled the original website. The new site is designed to highlight how a SharePoint 2007 site can integrate with various technologies whilst providing a clear layout and navigation.

Completed in 3 weeks

A key requirement of the engagement was to deliver the completed site in less than three weeks. SSW completed the concept designs and then implemented the site in one week.

Used a simple deployment approach

Microsoft requested that the SharePoint Conference website should be simple to use whilst looking clean and professional. In addition, the site was required to demonstrate the possibilities in customizing the look and feel of a public SharePoint 2007 site.

Interactive feel by using an Animation Framework

JQuery was used throughout the site to add rich interactivity in SharePoint 2007. The Agenda page is one example where JQuery allowed us to provide a better user experience. Virtual Earth integration was also used to identify the event locations.

“ The people at SSW were great to work with from concept to delivery, welcoming, friendly and professional - the outcome for us was a high quality site delivered in a very short timeframe. ”

Robin Young, Microsoft
